I NTRODUCTI ON

1. GENERAL

This Component Maintenance Manual (CMM) contains maintenance information and Illustrated Parts List (IPL) for the Soap Dispensers installed in aircraft lavatories.

The information is prepared in accordance with Air Transport requirements.

2. MANUFACTURER

The Soap Dispensers are manufactured by:

CAGE CODE: DL161

CBS - Carsten Daus GmbH Friedberger Str. 35 D-63452 Hanau (Germany)

Telephone: +49 (0) 6181 3040 818
Telefax: +49 (0) 6181 3040 885
E-mail: service@DausCBS.com
http://www.dauscbs.com

3. SPARES SUPPORT

The Soap Dispenser is supported by:

CAGE CODE: DL161

CBS - Carsten Daus GmbH Friedberger Str. 35 D-63452 Hanau (Germany)

Telephone: +49 (0) 6181 3040 818
Telefax: +49 (0) 6181 3040 885
E-mail: service@DausCBS.com
Internet: http://www.dauscbs.com

SOAP DISPENSER SEIFENSPENDER P/N 644-0027 No.: 25-40-04

Issue: A

Date: Oct 01/2013

4. LAYOUT OF MANUAL

This manual contains 14 chapters. The main chapters are general description and operation followed by data for testing and fault isolation, repair, disassembly and assembly of the Soap Dispenser. This is followed by an Illustrated Parts List which gives detailed breakdown information.

5. MAINTENANCE POLICY

The Component Maintenance Manual provides procedures that will enable an approved repairer, who is unfamiliar with the component, to restore the Soap Dispenser to a serviceable condition. These procedures are prepared for the shop mechanic who performs work.

6. REVISION SERVICE

This manual will be updated as required by revisions. Changes to hardware given in service bulletins will be included in this manual with revisions. Configuration changes will be shown in the text by the service bulletin number, i.e. pre SB- and post SB-. Procedures of illustrations not identified by pre SB- or post SB- refers to all configurations. In order to receive all new revisions and service bulletins you can subscribe to an online revision service at: http://www.dauscbs.com/en/newsletter.php

7. SHOP VERIFICATION

The procedures within this manual have been shop verified by the manufacturer. The sections Testing, Disassembly and Assembly and Storage were verified by actually performing the functions described in these sections.

8. WARNING, CAUTIONS, NOTES

These adjuncts to the text are expressed by the following headings:

WARNING: WARNINGS CALL ATTENTION TO THE USE OF MATERIALS, ROCESSES,

PROCEDURES, METHODS OR LIMITS WHICH MUST BE ADHERED

PRECISELY TO AVOID DEATH OR INJURY TO PERSONS.

CAUTION: CAUTIONS CALL ATTENTION TO METHODS AND PROCEDURES WHICH

MUST BE FOLLOWED TO AVOID DAMAGE TO EQUIPMENT.

NOTE: NOTES CALL ATTENTION TO METHODS WHICH MAKE THE JOB EASIER.

9. MEASUREMENT UNITS

All the units in this manual are metric with English equivalents shown in brackets. Units of temperature are in degree Celsius, Fahrenheit shown in brackets.

DESCRIPTION AND OPERATION

1. GENERAL

This section has description and operation information for the Liquid Soap Dispenser.

2. DESCRIPTION

- A. The Liquid Soap Dispenser, herein referred to as the unit, is installed in aircraft lavatories. The unit is mounted on the lavatory cabinet surface. The disposable soap bottle is placed inside the unit.
- B. The cover (10) and holder (20) are made of stainless steel; inside-cover is made of PSU-plastic.
- C. The Liquid Soap Dispensers consists mainly of 3 parts:
 - Cover (10) allows to open and close the soap dispenser by turning
 - Holder (20) which is installed through a hole in the counter top, holds the disposable soap bottle (not included) inside and will be closed with the cover
 - Screw Assy (30) installation kit

3. OPERATION

A. The soap dispenser holds firm a disposable liquid soap dispenser bottle and outputs liquid soap by each manual depression of the pump of the disposable liquid soap dispenser. Single-hand operation of the unit is possible.

NOTE:

Cleaning of the unit must be carried out after 18 months or whenever it is obviously necessary (Ref. to chapter CLEANING).

4. TECHNICAL DATA

A. Filling capacity

The unit can hold disposable liquid soap dispenser bottles from different manufacturers with a filling capacity of:

- Manufacturer: CBS Carsten Daus GmbH
 A variety of disposable liquid foaming hand soap dispensers, content 0, 250 l (8. 45 oz.) for approx. 360 washings
- Manufacturer: Celeste Industries Inc.

A variety of disposable liquid hand soap dispensers, content and washings are depending on the manufacturer and are out of our influence or responsibility.

TESTING AND FAULT ISOLATION

1. GENERAL

- A. This section contains testing and fault isolation for the Soap Dispenser.
- B. The procedures given below must be completed if a failure is found with Liquid Soap Dispenser during use, or to make sure that the unit is serviceable before it is put into or put back into service.
- C. Carry out all procedures in a clean area to avoid scratches or other damages of any part.
- D. Numbers in parenthesis following item names in the procedures refer to the figures and item numbers in page-block 10001, ILLUSTRATED PARTS LIST.
- E. Make a visual inspection of the Liquid Soap Dispenser as detailed in page-block 5001, CHECK.

2. LIST OF POSSIBLE DEFECTS

NOTE: Ensure that soap bottle is filled. If the unit does not discharge any soap and defects listed below are not determinable, replace soap bottle (Refer to chapter SERVICING).

FAULT	PROBABLE CAUSE	CORRECTION ACTION
NO, OR INSUFFICIENT SOAP DISCHARGE	A. PUMP OF THE DI SPOSABLE SOAP BOTTLE MIGHT BE LOOSE OR BROKEN	- CHECK CONNECTION BETWEEN PUMP AND BOTTLE; IF FAULT CONSIST REPLACE FAILING BOTTLE WITH A NEW ONE
UNIT CAN NOT BE CLOSED	B. COVER IS BROKEN	- REPLACE COVER
	C. HOLDER IS BROKEN	- REPLACE HOLDER
	D. DISPOSABLE SOAP BOTTLE IS TOO LARGE	- REPLACE DI SPOSABLE SOAP DI SPENSER BOTTLE WITH A NEW SOAP DI SPENSER BOTTLE WITH THE CORRECT SIZE

DI SASSEMBLY

1. GENERAL

A. The disassembly of the Soap Dispenser Base Unit is necessary to replace a part, to carry out repairs, or to overhaul the Soap Dispenser Base Unit.

NOTE: The degree of disassembly carried out shall not be more than necessary. For identification of damage or function failures refer to the chapters CHECK and TESTING AND FAULT ISOLATION.

2. PROCEDURE

Disassembly of P/N 644-0027 (Ref. IPL, Fig. 1A to 4A)

- (1) Remove cover (10) by turning it counter clockwise from holder approx. 5mm (20) and lift it off.
- (2) Remove disposable soap bottle if any inside the holder (20).

NOTE: For procedure refer to chapter SERVICING.

- (3) Disassembly of Screw Assy (Ref. IPL, Fig. 4A)
 - (a) Remove nut (70) from screw (40).
 - (b) Separate nut (70), metal washer (60), washer rosette (50) and screw (40) from holder (20).

I NTRODUCTI ON

1. GENERAL

This IPL contains the complete listing of all replaceable parts of the $P/N\ 644-0027$ unit.

2. MATERIAL ARRANGEMENT

- A. This IPL comprises the following sections:
 - (1) Introduction

The introduction contains all explanatory information for the individual sections as is necessary for use of this IPL. The introduction further contains a list of abbreviations used in detailed parts list as well as a list of manufacturer's codes together with manufacturer's names and addresses.

- (2) Numerical Index
 - (a) This section contains a listing of part numbers of all items listed in the detailed parts list in alpha/numerical sequence with cross-reference to respective Fig./Item Nos. as well as units per assy. The order of precedence in beginning the part number arrangement at the left-hand (first) position is as follows:
 - Letters A through Z (except ,0' to be considered zero),
 - numerals 0 through 9.
 - (b) For subsequent rows, the order is:
 - a dash (-),
 - Letters A through Z (except ,0' to be considered zero),
 - numerals 0 through 9.
- (3) Detailed Parts List
 - (a) Column FIG. ITEM

The first number in the first line of a page indicates the number of the figure illustrating the part. The second number indicates the item number by which the part is identifiable on the illustration. A dash (-) placed before the item number indicates the part is not illustrated.

SOAP DISPENSER SEIFENSPENDER P/N 644-0027

No.: 25-40-04

Issue: A

Date: Oct 01/2013

Column PART NUMBER (b)

The part number column contains the Lufthansa Technik part number.

(c) Column AIRLINE STOCK NUMBER

This column is left blank for airline internal use.

(d) Column IND

> The indenture system shows the relationship of parts and assemblies to next higher assemblies or installations as follows:

I ND

- 1 Assembly or installation assembly RF number.
- 2
- Detail parts of assembly or sub-assembly.

 Detail parts of sub-assembly or sub-assembly.
- etc.

Column NOMENCLATURE (e)

1 Attaching parts

Attaching parts are captioned ATTACHING PARTS and are listed immediately following the parts attached.

The *** symbol follows the last item of the attaching parts group. Column EFF CODE

2 Cage (Vendor) Code

Parts manufactured by companies other than CBS-Carsten Daus GmbH are identified by an appropriate cage (vendor) code following the nomenclature. Vendor codes are in accordance with current issues of Federal Supply Codes for Manufacturers Cataloguing Handbooks H4-1, H4-2 and H4-3, and are preceded by the letter "V". Standard parts such as An, MS etc. are not identified by a vendor code.

SOAP DISPENSER SEIFENSPENDER P/N 644-0027 No.: 25-40-04

Issue: A

Date: Oct 01/2013

(f) Column EFF CODE

The Effectivity Code column establishes a part relationship with units or assemblies which are essentially the same but have minor deviations. These units or assemblies are assigned reference letters such as A, B, C etc. Parts which are not common to all configurations but are associated with one or more of the coded lead items, carry the letter or letters assigned to the lead item with which it is associated. Where a part is common to all lead items, the effectivity column is left blank.

(g) Column UNITS PER ASSY

This column contains the quantity of a specific catalog sequence numbered part required in the build sequence of only one (where more than one exists) next higher subsub-assembly, sub-assembly, assembly or installation level as applicable. For bulk items, the letters "AR" are inserted in the quantity column to indicate "as required". Where items are listed for reference purpose, "RF" is inserted.

- (4) Explanation of Terms and Symbols
 - (a) Part numbers with more than 15 characters require the introduction of a dummy part number with a cross-reference to the over length part number. This will be shown in the detailed parts list as follows:

 "OPN xxxxxxxxxxxxxxxxxx (Vx)
 - (b) Part numbers amended with a capital letter (shown in the nomenclature column) means that this equipment is improved without any change to the operational effect.
 - (c) The term "REPLD BY" means that the part in the part number column is replaced by and is interchange-able with the part number shown in the notation.
 - (d) The term "REPL" means that the part in the part number column replaces and is interchangeable with the part number shown in the notation.
 - (e) The term "ALT" means that the part is an alternative for another part with equal value, weight, dimension, etc. Can be noted with certain specifications or completely interchangeable.

SOAP DISPENSER
SEIFENSPENDER
P/N 644-0027

No.: 25-40-04

Issue: A

Date: Oct 01/2013

- (f) The term "IND" means that the part is completely equal to other variants listed without any differing specifications. It may be used in any instance where the alternate part is referenced.
- (g) The term "NP" means that the part is not procurable. Order next higher assembly.
- (5) List of Abbreviations

The following abbreviations are used in this IPL:

I NSTALLATI ON

A. List of Materials

<u>NOTE:</u> Equivalent substitutes can be used for listed items.

MATERI AL	SPECI FI CATI ON	SOURCE
METAL WASHER (aluminium)	644-0035	LOCAL PURCHASE OR CBS
SELF-SECURING NUT (stainless steel)	644-0036	LOCAL PURCHASE OR CBS

INSTALLATION MATERIALS TABLE 13001

B. General

NOTE:

Before first installation, the location has to be chosen taking into consideration the available space needed to install all parts into the cabinet surface. The diameter of the mounting hole must be 5,5 mm (0.22 in.)

C. Procedure

- (1) Installation of Unit P/N 644-0027 (Ref. Fig. 13001)
 - (a) Place screw (40) through washer rosette and through the mounting slot in the bottom of the holder (20).
 - (b) Insert screw (40) into the mounting hole of the cabinet.

NOTE: Ensure that the tendency of the holder extends over the sink and that it remains in position during further installation.

(c) Install metal washer (60) and self-securing nut (70) onto screw (40).

CAUTION: TO PREVENT DAMAGE TO THE HOLDER, DURING FASTENING SELF SECURING NUT, USE NOT TOO MUCH POWER. TORQUE VALUE IS 15,00 NM (11.06 lb.ft.).

(d) Tighten up self-securing nut (70) while fixing the screw with a screwdriver.

NOTE: For filling the unit refer to chapter SERVICING.

SERVI CI NG

1. REFILLING

The unit shall be refilled without removal of the soap dispenser base unit (bottle retainer assy). The special foam inlets can be used for adjusting the bottle retainer assy for different disposable soap dispenser bottles.

A. Procedure

- (1) Turn cover counter clockwise approx. 5 mm turn until cover has been released from holder.
- (2) Lift cover from the holder by moving it over the dosing pump.
- (3) Replace complete empty disposable soap bottle with new full disposable soap bottle.
- (4) Attach cover to the holder. Make sure the 3 pins of the holder fit into the slots of the cover.
- (5) Secure cover by turning clockwise until it stops (approx. after 5 mm turn).

(1) Turn cover counter clockwise approx. 5 mm turn until cover has been released from holder.

(3a) Remove the empty disposable soap bottle.
